

RENEWABLES

At UPS Industrial Services, we go beyond maintenance to deliver full-scope support across every phase of your project.

PRODUCTION FACILITIES

- ★ Renewable Diesel
- ★ Biodiesel Processing
- ★ Sustainable Aviation Fuel (SAF)
- ★ Hydrogen Infrastructure
- ★ Emissions Retrofit and Compliance Projects
- ★ Utility and Process Support

With the shift toward renewable fuel production reshaping how facilities are built, converted, and operated, UPS Industrial Services brings construction, retrofit execution, and specialty field services to renewable fuel and energy transition projects. Whether you need a full conversion, a new unit build, or execution support through an active retrofit, our teams move seamlessly between brownfield environments, live facility tie-ins, and new construction, keeping your project on schedule at every phase.

CONVERSIONS, RETROFITS & STARTUPS

Execution support for evolving facilities, infrastructure upgrades, and active processing environments, including constructability planning, coordinated trade execution, and safe tie-ins inside operating facilities.

- ★ **Facility Conversions**
- ★ **Process System Retrofits**
- ★ **Tie-Ins and Upgrades**
 - Safe tie-in execution inside active and operating facilities
 - Integration with legacy systems and existing infrastructure
- ★ **Constructability Planning and Trade Coordination**
- ★ **Commissioning and Startup**
- ★ **Operational Continuity**

CONSTRUCTION & FIELD EXECUTION

Multi-discipline execution across brownfield and greenfield construction, maintenance, and project delivery.

- ★ **Mechanical and Piping**
- ★ **Structural Modifications**
- ★ **Specialty Welding**
- ★ **Modular and Staged Construction**
 - Pre-assembly and skid handling
 - Phased execution around active operations
- ★ **Instrumentation and Electrical**
 - Startup integration and DCS tie-ins
 - Loop checks and control system coordination
- ★ **Crane and Rigging**
 - Critical lifts around live units and constrained sites
- ★ **Scaffolding**

HYDROTREATER & CATALYST SUPPORT

Specialized support for renewable diesel and hydrotreating operations.

- ★ **Catalyst Handling and Bed Loading**
 - Reactor loading and unloading operations
 - Sock and dense-phase loading
 - Inert-entry and confined space support
- ★ **Reactor and Vessel Internal Services**
- ★ **High-Pressure Piping Systems**
- ★ **Feed and Product System Modifications**

**PROFESSIONAL CRAFT.
EXCEPTIONAL RESULTS.**
